Potable Water Transfer

Lancer® is the potable water transfer hose made exclusively by Crusader Hose. It is designed and engineered primarily for the mining and chemical industries as well as for municipal use. **Lancer®** is made with a high-tenacity polyester filament yarn jacket and by thermoplastic polyurethane (TPU) thru-the-weave extrusion in a variety of colours. The blue PU-lined hose is also available in an uncoated version.

Lancer® is suitable for temporary by-pass, chemical and air transfers, vertical- & high-pressure applications and for potable water supply. Unaffected by ozone and UV degradation, this hose is tough and durable and is resistant to acids, alkalis and other chemicals. The lightweight and low volume coil makes **Lancer®** easy-to-handle and store.

Lancer® is Australian made and manufactured in our ISO 9001 quality-accredited factory. It is suitable for food contact usage and carries the approval of Australian Standard AS4020 as well as conforms to German BGA DIN39. **Lancer®** is back by a 12-month warranty against manufacturing faults.

Features:

- ✓ Reliability
- ✓ Suitable for potable water transfer
- ✓ Available in Extruded or Uncoated
- ✓ Working Pressure up to 2100 kPa
- ✓ Light and quick to deploy
- ✓ Low maintenance
- ✓ Australian Standard AS4020
- ✓ Assembly and fittings available
- ✓ 12-months warranty
