

# RAPIER

## Extruded PVC Hose

**RAPIER®** is an extruded hose with a PVC/nitrile outer cover. It is classified as a Type 3 hose and is a popular choice for:

- small/domestic irrigation
- fire hose
- industrial plant protection
- air hose

### Features:

- ✓ Easy to roll and handle compared to poly pipe
- ✓ High tensile load compared to braided hose
- ✓ Maintenance free
- ✓ Light weight
- ✓ Abrasion resistant
- ✓ Long operational life
- ✓ Other colours available (red or blue)
- ✓ Available up to 100m
- ✓ One-year guarantee

The extruded cover gives it protection against abrasion damage and makes it easy to wipe free of oils stains and dirt.

The extruded cover comes in a standard red colour but other colours such as yellow or blue can also be supplied. This can help differentiate between domestic irrigation (yellow), fire hose (red) and wash-down hose (blue) on the same industrial site.

Inside Diameter	Mass per Metre	Minimum Burst Pressure	Recommended Working Pressure	60m Coil Diameter
25 mm	0.23 kg	5250 kPa	2100 kPa	0.60 m
38 mm	0.30 kg	5250 kPa	2100 kPa	0.70 m
51 mm	0.43 kg	5250 kPa	2100 kPa	0.80 m
65 mm	0.56 kg	5250 kPa	2100 kPa	0.90 m

*\*For applications above 100m, consider using **Flexidrag®***
