

Installation roller

Flexibore® installation accessory

5 tonne-rated
installation roller

IDEAL FOR

- Installation and retrieval
- Flexibore® 150 - 400 series hose
- Vehicle-assisted installation method

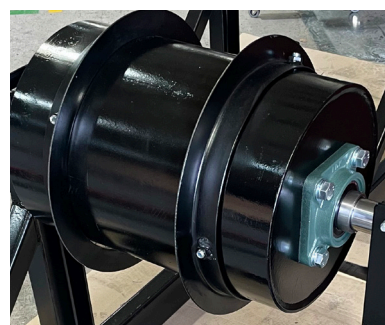

The Crusader Hose **installation roller** is a valuable Flexibore® accessory. Our **installation roller** is the perfect tool for installing or retrieving your submersible pump when using the vehicle installation method.

The popular 5 tonne-rated roller has been redesigned with many desirable features ensuring a smoother and more efficient installation.

Crusader Hose also offers a 10.5 t-rated **installation roller** for large diameter or Flexibore® 400 systems.

Simple to use, the **installation roller** placed over the bore allows the flexible rising main to be guided safely into the bore casing while the vehicle slowly reverses.

To be used with lifting clamps.
