

Cable ties

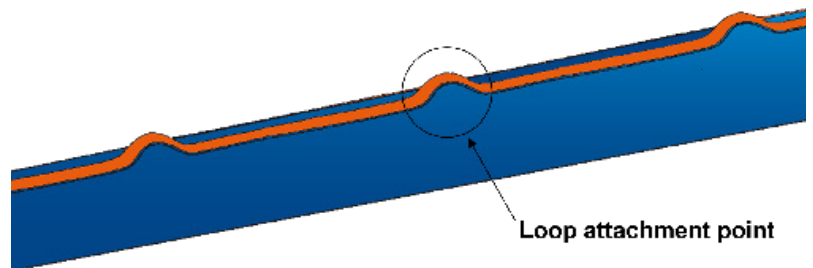

Flexibore® installation accessory

Power cable secured with cable ties

Cable ties are a great way to secure your power cable to Flexibore®, our flexible riser. Flexibore® is manufactured with a coloured strip that creates loop attachment points to secure your power cable. For smaller diameter power cables for bores up to 150 m deep, **cable ties** are sufficient and quicker to handle. For the Flexibore® warranty to remain valid, only Crusader Hose-approved heavy-duty cable ties may be used.

- Flexibore® 100 - one **cable tie** is used at each loop.
- Flexibore® 250 & 150 - two **cable ties** are used at each loop.

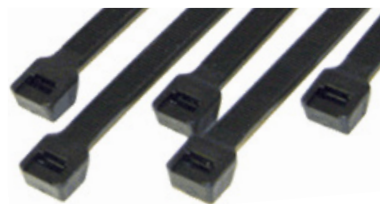

Flexibore® has a strip with loop attachment points to secure your power cable:

Flexibore® 100: all Ø = loop attachment point at every 1 m

Flexibore® 150 - 400: < 102 mm Ø = loop attachment point every 1 m

Flexibore® 150 - 400: > 102 mm Ø = loop attachment point every 0.5 m

Heavy-duty polypropylene cable ties

Cable ties for Flexibore® 100

Hose diameter (ID)	32 mm	51 mm
