

Sabre™

Percolating fire hose

12
MONTH

WARRANTY

Sabre is a percolating hose which allows water to seep through the textile reinforcement. By mechanically pin pricking the hose over its length, a thin water layer forms over the hose offering extra protection against burning coals.

Sabre is a Class H fire hose with a high working pressure of 2100 kPa. This woven fire hose is made from filament polyester with a synthetic polymer lining and is manufactured with various percolation rates.

LP - Low Percolation (Standard)

MP - Medium Percolation

HP - High Percolation

Sabre is fully synthetic, making the fabric imperishable to moisture, unlike the original canvas percolating fire hose. It does not require drying after use, although drying does prevent surface mould stains.

MILDEW RESISTANT

BURST PRESSURE

PERCOLATING

NO MAINTENANCE

FEATURES

- ✓ Percolating fire hose
- ✓ No drying required after use
- ✓ Working pressure 2100 kPa
- ✓ Australian Made
- ✓ Easy to handle
