

Cable Ties

Flexibore® installation accessory

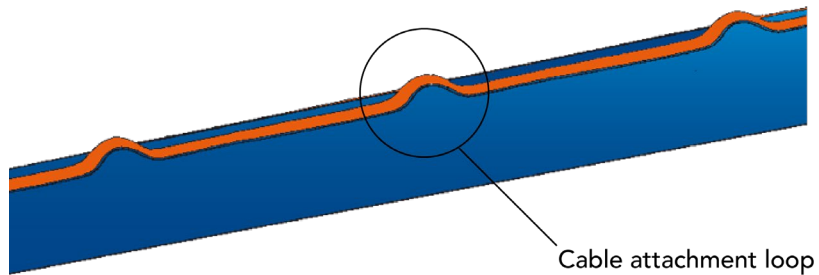

Well-snaked power cable secured with heavy-duty Cable Ties

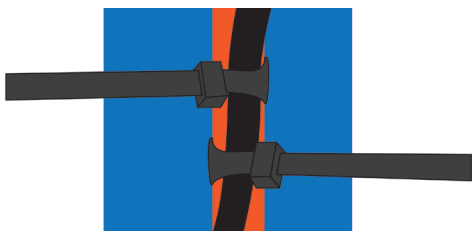

Cable Ties are a quick and easy way to secure your power cable to Flexibore, our flexible rising main. Flexibore is manufactured with a coloured strip that creates cable attachment loops to secure your power cable. Depending on the thickness of the cable, one or two **Cable Ties** are required at each loop.

Cable attachment location:

- FB100 all Ø = loop attachment point at every 1 m
- FB250 < 102 mm Ø = loop attachment point every 1 m
- FB250 > 102 mm Ø & FB150 all Ø = loop attachment point every 0.5 m

Although **Cable Ties** are best suited to FB100, they are also suitable when securing smaller diameter power cables to FB250 & FB150 to depths of up to 150 metres. Refer to the manual for the best results.

Two Cable Ties at every loop
